I determined at the time that I received the disclosure that the invention was fully conceived, and that the disclosure would fully enable a person having ordinary skill in the art to which the invention pertained to carry out the invention.

From September 2, 1999, and until November 24, 1999, I was engaged in the preparation of a patent application for the invention based on the disclosure, which application was filed on November 24, 1999, as U.S. Patent Application No. 09/448,179. The above-identified patent application was filed on January 2, 2002, and is a continuation application of U.S. Patent Application No. 09/448,179. I was assisted by Mr. Feigenbaum throughout this time, during which time Mr. Feigenbaum reviewed and corrected drafts of the patent application.

I further declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

Respectfully Submitted,
